## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gennaro US 6,317,834 in view of Subbiah US 6,035,403.

As per claims 1-3 Gennaro teaches a biometric access verification system, (Col 4 lines 54-56). Gennaro teaches obtaining and storing a biometric profile for a user to be authorized, (Col 5 lines 9-16). Gennaro teaches a biometric acquisition device for a user to submit a biometric sample, (Col 6 lines 14-20). Gennaro teaches obtaining a current biometric sample from an individual attempting to gain access, (Col 7 lines 38-41). Gennaro teaches comparing the current biometric sample to a previously stored biometric sample and allowing access if the user is authorized (Col 7 lines 42-50). Gennaro does not explicitly teach a biometric acquisition device.

Art Unit: 2134

It would have been obvious to one of ordinary skill in the art to use the mouse of Subbiah with the biometric system of Gennaro, because the system needs a biometric acquisition device, and Subbiahs device is very low cost (Col 4 line 65).

As per claim 4 Gennaro teaches denying access if the user is not authorized, (Col 8 lines 37-43).

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gennaro US 6,317,834 in view of Subbiah US 6,035,403 in view of Canestaro US 6,748,540

As per claim 5, the Gennaro-Subbiah combination teaches biometric acquisition and storage, (Col 4 lines 45-56).

The Gennaro-Subbiah combination does not disclose reporting unauthorized access attempts.

Canestaro teaches reporting a failed access attempts to an administrator for security reasons, (Col 2 lines 12-18, Col 7 lines 7-10). It would be obvious to one of ordinary skill in the art to add Canestaro's reporting failed access attempts with Gennaro's biometric access system because it would be advantageous to have an improved method for monitoring unauthorized access attempts to a computer system for administrators, (Col 2 lines 1-10 Canestaro).

Art Unit: 2134

## Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher J. Brown whose telephone number is (571)272-3833. The examiner can normally be reached on 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Morse can be reached on (571)272-3838. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
